

Mobile Settings gives you the option to provide your mobile number to receive Facebook notifications as text messages.

BUT if you do provide your mobile number and don't properly manage your privacy settings, people can search for your Facebook profile using your mobile number.

Under **App Settings** , there are 2 sections that you need to be aware of:

Apps others use lets you control the information that Apps can access about you when they are used by your Facebook friends. This includes information like your birthday, photos and where you live.

The screenshot shows the Facebook 'App Settings' page. On the left is a navigation menu with categories: General, Security, Privacy, Timeline and Tagging, Blocking, Notifications, Mobile, Followers, Apps (highlighted), Ads, Payments, and Support Dashboard. The main content area is titled 'App Settings' and includes a disclaimer: 'On Facebook, your name, profile picture, cover photo, gender, networks, username, and user id are always publicly available, including to apps (Learn Why). Apps also have access to your friends list and any information you choose to make public.'

The settings are organized into sections:

- Apps you use:** 'Use apps, plugins, games and websites on Facebook and elsewhere?' is set to 'On'. An 'Edit' link is present.
- Apps others use:** This section is highlighted with a red arrow. It explains that people can bring your info with them when they use apps. Below this is a list of categories with checkboxes:
 - Bio
 - My videos
 - Birthday
 - My links
 - Family and relationships
 - My notes
 - Interested in
 - Hometown
 - Religious and political views
 - Current city
 - My website
 - Education and work
 - If I'm online
 - Activities, interests, things I like
 - My status updates
 - My app activity
 - My photosAt the bottom of this section are 'Save Changes' and 'Cancel' buttons. A 'Close' button is in the top right corner of the section.
- Instant personalization:** 'Lets you see relevant information about your friends the moment you arrive on select partner websites.' is set to 'Off'. An 'Edit' link is present.
- Old versions of Facebook for mobile:** 'This setting controls the privacy of things you post using old Facebook mobile apps that do not have the inline audience selector, such as outdated versions of Facebook for BlackBerry.' is set to 'Only Me'. An 'Edit' link is present.

A 'Chat' button is visible in the bottom right corner of the page.

If you enable **Instant Personalisation**, you are letting outside websites, partnered with Facebook, to 'personalise' your experience when you visit their websites – including using your username and profile picture (Remember: Facebook consider these to be 'Public' information).

App Settings

On Facebook, your name, profile picture, cover photo, gender, networks, username, and user id are always publicly available, including to apps (Learn Why). Apps also have access to your friends list and any information you choose to make public.

Apps you use	Use apps, plugins, games and websites on Facebook and elsewhere?	On	Edit
Apps others use	People who can see your info can bring it with them when they use apps. Use this setting to control the categories of information people can bring with them.		Edit
Instant personalization	We've partnered with a few websites to provide you with great, personalized experiences the moment you arrive, such as immediately playing the music you like or displaying friends' reviews. To tailor your experience, these partners only access public information (like your name and profile picture) and other information you've made public. When you first arrive at the following sites, you'll see a notification message and an option to turn off the personalized experience: <ul style="list-style-type: none">Bing - Social SearchZynga - Social Games (CityVille, FarmVille and 8 other games)Kixeye - Social Games (War Commander, Battle Pirates and VEGA Conflict)Plarium - Social Games (Stormfall: Age of War)GSN - Social Games (Games by GSN)Williams Interactive - Social Games (Jackpot Party Casino Slots) To turn off instant personalization on all partner sites, uncheck the box below. <input type="checkbox"/> Enable instant personalization on partner websites.		Close
Old versions of Facebook for mobile	This setting controls the privacy of things you post using old Facebook mobile apps that do not have the inline audience selector, such as outdated versions of Facebook for BlackBerry.	Only Me	Edit

Chat

Apps others use and **Instant Personalisation** are turned on by default in most people's Facebook accounts – if you don't want your information shared, you need to turn them off. You might even decide it is just easier to turn off Apps altogether!
